EASY, TUNABLE & DYNAMIC

The binding is the most important link in the Nordic ski setup. Transferring power efficiently from the boot to the ski means smoother, faster skiing with less effort. The TURNAMIC® range brings groundbreaking innovations to Nordic skiers of all ability levels. They are intuitive and easy to use, meaning efficiency and speed for advanced skiers, and convenience for recreational skiers.

EASY

What makes the TURNAMIC® setup so compelling is its ease of use. The lightweight bindings quickly slide onto the plate without the need for tools. When it's time to ski, the Turn Lock mechanism can be easily operated even with a gloved hand. Entry and exit in any situation are now as simple as the turn of an easily accessed lever.

TUNABLE

Technique, temperature, and snow composition all have an influence on ski performance. All TURNAMIC® models offer completely tool free adjustment and fine tuning for individual needs. Simply slide the binding forward for more grip, or slide it rearward to improve glide and speed. Entry-level skiers and World Cup racers all enjoy the same easy tuning benefits.

DYNAMIC

The TURNAMIC® boot-binding-plate-ski setup provides unmatched dynamic skiing performance. The FLOWFLEX® design enables the ski to flex more freely. This gives serious skiers and racers more efficient power transfer for more speed, while recreational skiers will enjoy improved smoothness and control.
