FISCHERSPORTS.JP

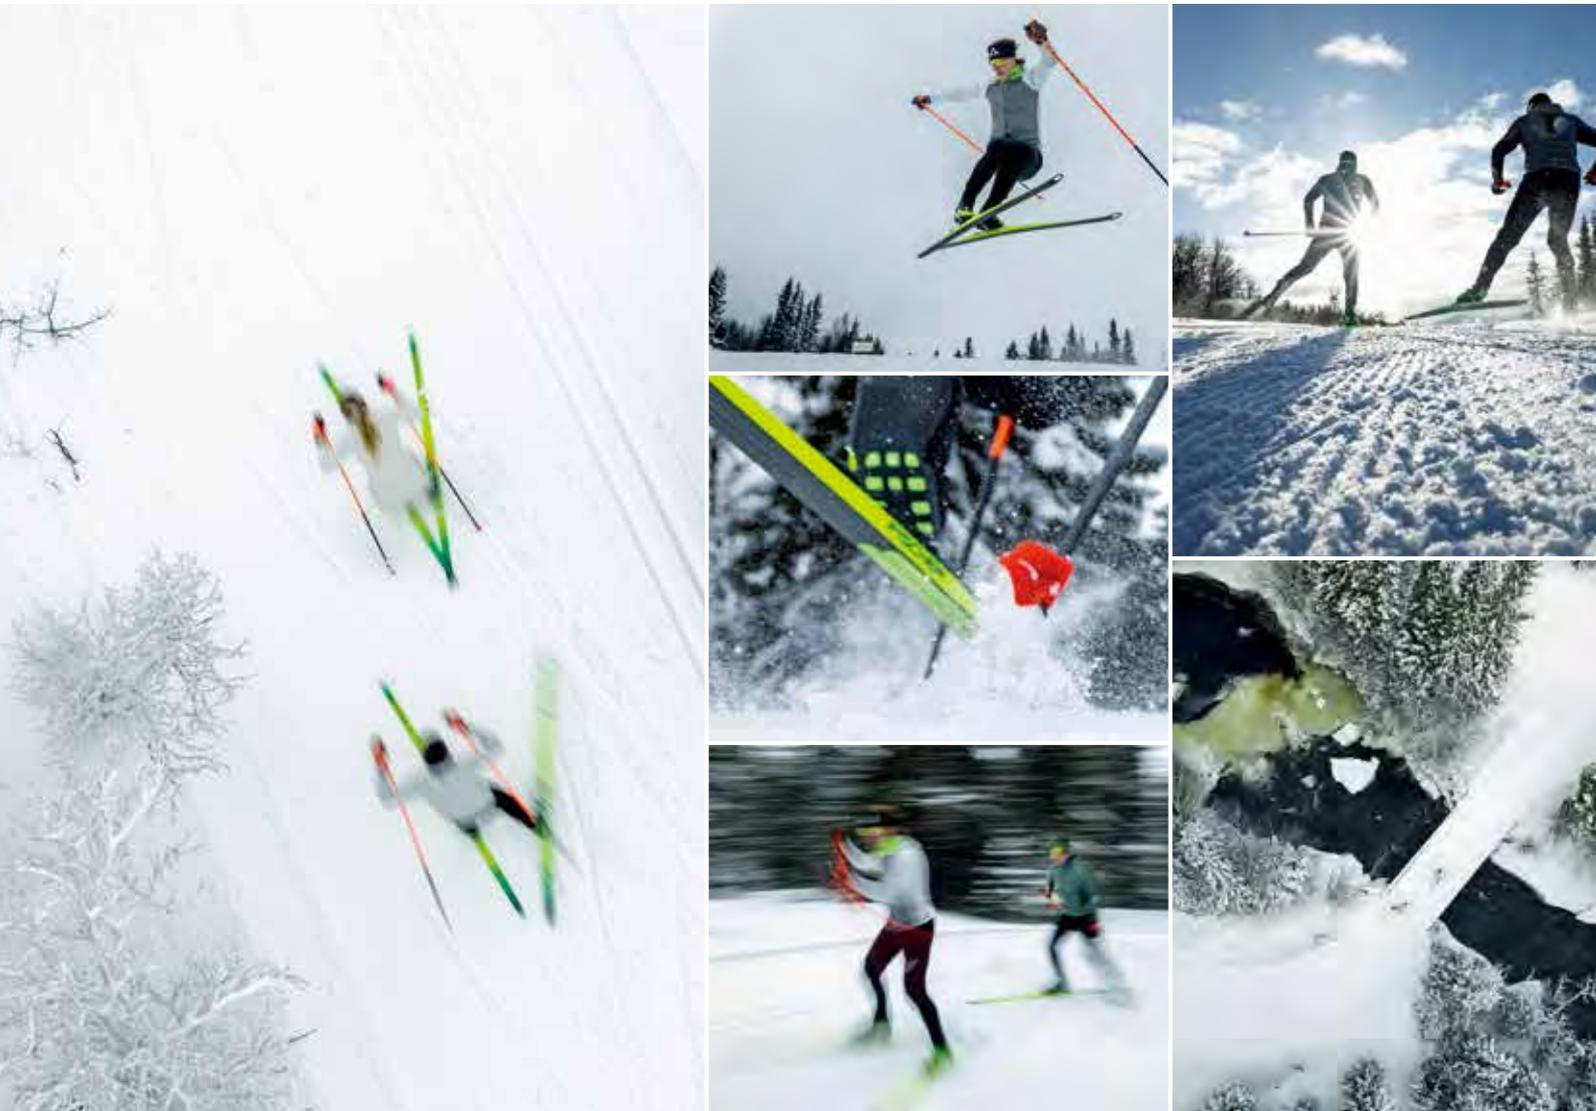

#LIVETOSKI

We take skiing seriously. Both Alpine and Nordic skiing.

Our devotion, commitment, and passion for skiing are what drives us. This passion and dedication have fostered a culture of great product innovation. It is hardwired in us. Our vision as a brand is to be the athlete's number one choice. We see it as our calling to enable new heights of individual performance and unforgettable moments with innovative, user-friendly products.

By doing so, we believe we will enable more people to find and share this passion, because to us skiing is not a lifestyle. It's life.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

FISCHERSPORTS.COM

THE CHOICE IS YOURS

RACE

Athletic individuals focused on improving and maximizing their performance and like to pace themselves with others. Races can be an integral focus of these consumers and be something they participate regularly.

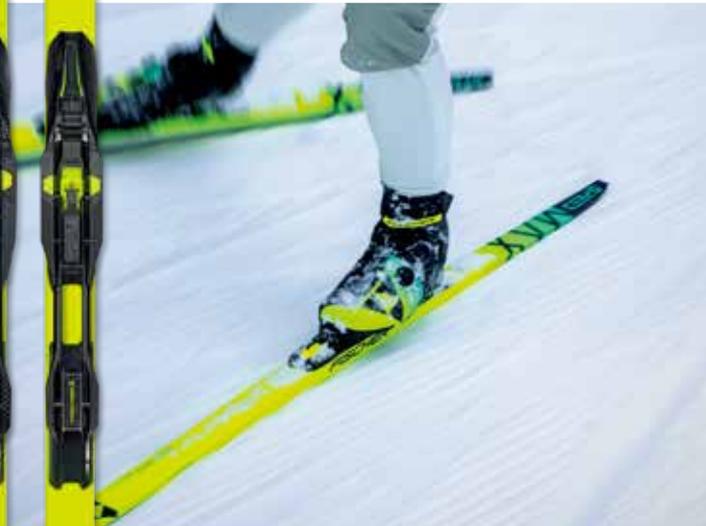

PERFORMANCE

Athletic individuals seeking to improve personal fitness (from beginners to intermediate and skilled xc skiers), who are not necessarily race ambition.

ACTIVE

Recreational skiers and newbies, who want to get out in the winter landscape for well-being and fitness activities.

The final product offer should be taken from the country price lists. Colors and technical specifications in the catalog may deviate from the original. Rights reserved for unannounced changes and typographical errors. © October 2025.

BETTER.
LIGHTER.
FASTER.

SPEEDMAX

S K I C O L L E C T I O N

The latest generation of the successful Speedmax ski series was developed in the World Cup and perfected for competitive athletes searching for featherweight performance, unbeatable power transfer, and maximum speed.

THE CHOICE OF CHAMPIONS. PROVEN IN GOLD.

**Cold Base Bonding
& Gliding Sidewall**
for enhanced glide

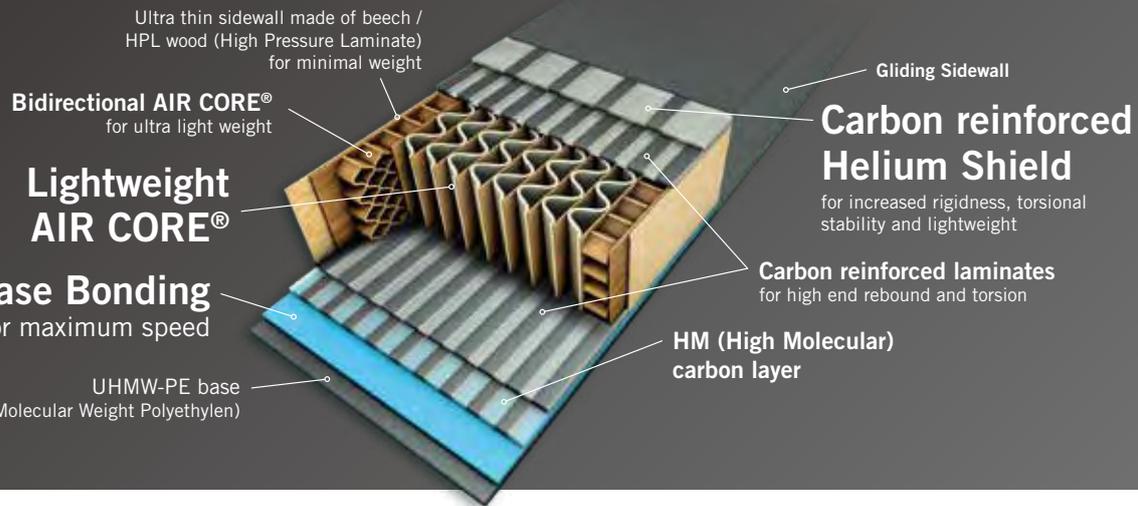

World Cup Tip
for reduced swingweight
& highest agility

**Lightweight &
increased stability**
thanks to ultra-light ski core

BIDIRECTIONAL AIR CORE

The Speedmax collection is more than just innovation - it is a commitment to performance at the highest level. Every detail reflects the pursuit of perfection, refined through the challenges of elite competition. Trusted by world-class athletes, these products stand for precision, passion, and proven success.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

BETTER. LIGHTER. FASTER.

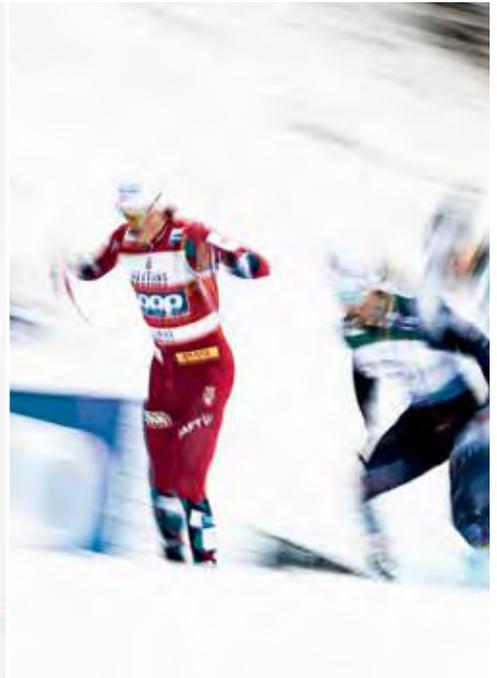

SPEEDMAX BOOT COLLECTION

The successful Speedmax boot series is being expanded. Thanks to the BOA® Fit System with 2-Zone, the top models Speedmax 9 and 7 enable individual adjustment in the heel and forefoot area. The innovative fit system is used in a total of nine out of twelve models.

The choice of
champions.
Proven in gold.

CARBONFUSED® Technology

Ergonomic molded cuff and/or heel counter with carbon fiber reinforced polymer structure for impressive power transfer, low weight and secure, comfortable fit.

Li2 BOA® Precision Fit System

The BOA Li2 dial platform offers a low-profile design, unprecedented durability, and improved sustainability. With incremental micro-adjustability in both directions, Li2 is the ultimate choice for a fast, effortless, and precision fit.

TURNAMIC® Speedmax Sole

Lightweight 2-piece TURNAMIC® outsole provides optimal flex, a lower stance, reduced weight, wider support, and minimal snow adhesion.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

BASE FINISH		
FINISH FIRST  <p>The finishing touch comes from Finish First: the term that covers and unites all the individual technological steps in the course of the final treatment of the base.</p>	DIAMOND TUNED GRINDING (DTG) WORLD CUP PLUS / COLD / PLUS COARSE  <p>PLUS: Optimised Plus grinding finish from the World Cup with universal range of use. It is suitable for all types of snow and ensures the best speed in a wide range of temperature. COLD: Cold grinding finish from the World Cup. The very flat structure is best suited for very cold temperature and particularly fine snow conditions. PLUS COARSE: Special grinding finish from the World Cup. The deeper and coarser structure is perfectly suitable for coarse-grained and moist snow at temperatures of 0°C and warmer.</p>	
SPEED GRINDING 2.0  <p>Reworked universal stone grinding for perfect gliding properties in all snow conditions.</p>	ULTRA TUNING®  <p>Unrestricted gliding. Offset base structure makes the ski fast and suitable for all uses.</p>	PREWAXED  <p>Preparation with basic wax for protection against dirt and oxidation. Powered by VAUHTI. Iron in again before first use, cool down and brush out. Then apply wax (paraffin or liquid wax) to match the snow conditions.</p>
CONSTRUCTIONS		
WORLD CUP TIP  <p>The lower and shorter tip construction follows the demands of real racing. It reduces the ski's swingweight to a minimum, enabling highest agility.</p>	HELIUM SHIELD  <p>An exclusively developed mix of carbon and glass fiber laminates enables Fischer to significantly reduce the weight of the ski well-maintaining the same torsional stability and performance characteristics.</p>	COLD BASE BONDING  <p>The revolution in ski making: Speedmax technology to protect the homogeneous molecular structure of the base for perfect wax absorption. Guarantees maximum speed.</p>
GLIDING SIDEWALL  <p>Newly introduced World Cup technology is a thin waxable layer on the sidewalls to reduce friction for more speed with less energy. Waxable with liquid wax only.</p>	SKATING 610  <p>Race-specific skate ski construction for maximum speed with pressure relief at the ski tip and tail. Perfect on compact to soft snow.</p>	SKATING 61K  <p>Special race skate ski construction for maximum speed through increased pressure relief at the ski tip and tail. Perfect on soft snow.</p>
SKATING 115  <p>Skate ski construction with wider contact areas and minimum splay in tip and tail for increased stability and control. Ideal for hard snow conditions.</p>	SKATING AEROGUIDE  <p>Moderate tip splay of the ski combined with strong sidecut and two guide grooves for excellent stability with good gliding properties. Perfect for learning and improving technique.</p>	CLASSIC 902  <p>Classic race ski construction with noticeable pressure relief at the ski tip and tail for a direct, quick, and safe kick phase. Ideal for: Universal to wet conditions; klister.</p>
CLASSIC 702  <p>Classic race ski construction with large tip and tail splay and long, dynamic wax pocket pattern for minimum wax loss through friction. Ideal for: Cold conditions, dry wax conditions.</p>	CLASSIC 812  <p>Classic race ski construction with long, dynamic wax pocket pattern for minimum wax loss through friction. Ideal for: Cold conditions; dry wax conditions.</p>	DOUBLE POLING  <p>Construction for double poling with wider contact areas and minimum splay in tip and tail for maximum speed. Ideal for universal to hard snow conditions.</p>
DOUBLE POLING PLUS  <p>Construction for double poling with shorter contact areas and large splay in tip and tail for maximum speed. Ideal for warm and soft snow conditions.</p>	PRECISION PAIRING SYSTEM  <p>The next generation in ski pairing: fully automatic dynamic measurements of a multitude of pairing criteria ensures precise ski choice and optimised pairing.</p>	COMPUTER FLEX CONTROL  <p>Minimises differences in residual tension and camber pressure. Top climbing and kick performance.</p>
FISCHER CARBON FIBRE  <p>Multiaxial T300 1K carbon fibre. High strength and minimum weight laminate.</p>	NORDIC ROCKER CAMBER  <p>Slightly opened ski tips for perfect gliding properties in unprepared terrain. Enables lighter turning with less effort.</p>	RENTAL TAIL PROTECTOR  <p>Special components for extremely robust ski tails ensure they fulfil the durability requirements of ski rental.</p>
POWER LAYER  <p>0.2mm thin, extremely lightweight, full-surface high-pressure laminate comprising natural fibres and resin for noticeable ski weight reduction.</p>	POWER EDGE  <p>Reinforced ski chassis ensures longer service life. Homogeneous pressure distribution ensures uniform wax wear.</p>	STEEL EDGE  <p>Narrow steel edge along the entire length of the ski. Guarantees constant edge contact on every surface.</p>
TWO GROOVES  <p>Two parallel, continuous grooves in the base provide improved stability and control while gliding.</p>	EFFICIENT FORWARD  <p>Thanks to the revolutionary composition of proven materials the elasticity of the body of the ski is extremely increased: this guarantees a forgiving kick action and a new, easy-going skiing experience.</p>	POWER CAP  <p>Durable cap construction with Air Channel wood core – for a strong weight-to-performance ratio, stable handling, and long-lasting performance thanks to improved protection against external impacts.</p>
CLIMBING SYSTEMS		
VARIO CROWN®  <p>The newest generation of Crown technology: a combination of Single, Double and Gliding Crown for efficient power transfer and optimum gliding properties.</p>	PREMIUM CROWN®  <p>Combination of Single and Double Crown for greater climbing and better gliding in all snow conditions.</p>	CROWN® TEC  <p>The sharp-edged, offset step pattern enables reliable climbing in all conditions. Single, Double Crown or combined system.</p>
OFFTRACK CROWN®  <p>Climbing system in all terrain, especially away from the prepared tracks and also in difficult terrain conditions. Developed exclusively for Fischer.</p>	TWIN SKIN  <p>Two separate skin strips arranged in offset positions and with variable base-depth integration result in smooth and balanced gliding. Mohair / Mohair mix skins ensure you can rely on the kick action.</p>	FISCHER EASY SKIN  <p>The easiest way to attach climbing skins: combination of adhesion and click-in-place for reliable grip and straightforward attachment and removal.</p>
OFFTRACK CROWN® & FISCHER EASY SKIN  <p>Exclusive climbing system combination for steel edge skis. If Offtrack Crown no longer grips in steep terrain, it's time for Fischer Easy Skin. Like a switch-on all-wheel drive.</p>	SUPER SKIN  <p>Full-length climbing skin, which is easily attached by metal hooks at the end of the ski and elastic attachment in the ski tip for steeper ascents and more grip.</p>	DUAL SKIN  <p>The combination of Easy Skin and Super Skin: Depending on the terrain and snow conditions, you can easily switch between the two proven climbing skins.</p>
ZERO  <p>Three-part roughened base developed for racing for temperatures around 0°C and warmer. Ideal second ski for difficult wax conditions.</p>		

CORES

<p>BIDIRECTIONAL AIR CORE®</p>  <p>Fischer's lightest core thanks to the bidirectional Air Core construction combined with highly modular carbon fibres and Fischer's proprietary Cold Base Bonding process.</p>	<p>AIR CORE® HM CARBON</p>  <p>Proven Air Core material with over 80% air content for extremely light weight combined with highly modular carbon fibres and Fischer's proprietary Cold Base Bonding process.</p>	<p>AIR CORE® CARBON</p>  <p>Proven Air Core material with over 80% air content for extremely light weight combined with duroplast and carbon fibres as well as Fischer's proprietary Cold Base Bonding process.</p>
<p>AIR CORE® BASALITE PRO</p>  <p>Very lightweight and torsion-free Air Core construction with highly stable sidewalls. Duroplast combined with volcanic basalt fibers for perfect flex characteristics regardless of temperature.</p>	<p>AIR CORE® BASALITE</p>  <p>Lightweight combination of proven Air Core material and extremely lightweight wood with specially grooved air channels. Volcanic basalt fibers for perfect flex characteristics regardless of temperature.</p>	<p>AIR TEC® BASALITE</p>  <p>Core made of extremely lightweight wood with special air channels combined with stable sidewalls. Volcanic basalt fibers for perfect flex characteristics regardless of temperature.</p>
<p>AIR CHANNEL BASALITE</p>  <p>Durable, weight-reduced wood core, thanks to specially grooved air channels, combined with stable sidewalls. Basalt fibers for perfect flex properties regardless of the temperature.</p>	<p>AIR TEC® STEEL EDGE</p>  <p>Weight-optimized wooden core with specially grooved air channels in combination with the use of steel edges.</p>	<p>AIR CHANNEL</p>  <p>Durable, weight-reduced fiberglass wood core with specially grooved air channels, combined with stable sidewalls.</p>

TECH FEATURES

<p>SPEEDMAX CARBONFUSED CUFF</p>  <p>This cuff is manufactured with CARBONFUSED® Technology which fits like a glove while providing outstanding side stability combined with unrestricted dorsiflexion. The Velcro fastener, which can be replaced without tools, simplifies replacement if necessary.</p>	<p>HINGED POLYMER CUFF</p>  <p>Ergonomic molded cuff for remarkable side hold with good freedom of movement to the front and back. Easy to adjust with Velcro fastener. EVA padding depending on model.</p>	<p>INTEGRAL CARBON CHASSIS</p>  <p>Outer sole, insole and side stabilisation elements manufactured from the same sheet of carbon. For previously unattained light weight with optimum stability power transfer.</p>
<p>INJECTED EXTERIOR HEEL CAP</p>  <p>Good heel cradling and robust protection all in one: exterior heel cap for even better power transfer.</p>	<p>INTERNAL MOLDED HEEL CAP</p>  <p>Internal anatomically shaped heel cap. Very light and individually thermoformable.</p>	<p>CARBON ZONE CONTROL</p>  <p>Carbon Zone Control enables to provide the optimal flex and torsion stiffness throughout all cross-sections of the integral carbon chassis. Mindfully designed geometry and carbon-layup for the individual needs of skating, classic or combi boots on cutting-edge race level.</p>
<p>CARBONFUSED® TECHNOLOGY</p>  <p>Ergonomic molded cuff and/or heel counter with carbon fiber reinforced polymer structure for impressive power transfer, low weight and secure, comfortable fit.</p>	<p>BOA® FIT SYSTEM - LI2</p>  <p>The BOA® Li2 dial platform offers a low-profile design, unprecedented durability, and improved sustainability. With incremental micro-adjustability in both directions, Li2 is the ultimate choice for a fast, effortless, and precision fit.</p>	<p>INTERCHANGEABLE CUFF</p>  <p>Screw-mounted cuff enables easy maintenance and personalization if another cuff size is required. Torx T20 flat head stainless steel M4x8mm screw is secured with Loctite blue threadlocker.</p>
<p>FISCHER SPEED LOCK SYSTEM</p>  <p>Revolutionary quick lock with minimum size and weight. Simply pull the laces tight – that's it! The system is safe and reliable.</p>	<p>WATER RESISTANT DESIGN</p>  <p>Highly water resistant boot design with a breathable membrane connected to the lining. Triple-F membrane prevents the boot from moisture when dealing with wet conditions, and speeds up drying time between ski sessions.</p>	<p>TRIPLE F® MEMBRANE</p>  <p>Special membrane ensures that conditions inside the boot are perfect: dry, warm and breathable.</p>
<p>SEAMLESS UPPER</p>  <p>No-stitching seams in the upper material is not just a matter of aesthetics, it provides also best protection against water and long lasting bonding.</p>	<p>THERMO MOULDABLE DESIGN</p>  <p>Boots featuring TMD are ready for custom boot fitting. All materials used for the shoe upper are adaptable with heat and special tooling. Easy work for boot service staff and boot-fitters. Optimized fit for consumers with individual orthopedic needs like hallux valgus or ganglions.</p>	<p>SEALED ZIPPER</p>  <p>The specially sealed zipper system ensures that any moisture is kept out.</p>
<p>INTEGRATED GAITER</p>  <p>Integrated, easily adjustable gaiter for optimum protection in deep snow. Waterproof lightweight material and sealed zip for maximum cross country skiing enjoyment even in untracked terrain.</p>	<p>LACE COVER</p>  <p>Lace covers for additional protection against the snow and wet conditions and to give you a comfortable warm feeling.</p>	<p>GAITER RING</p>  <p>Fastening for all popular gaiter models for additional protection against the snow and wet conditions.</p>
<p>LEATHER UPPER</p>  <p>Natural upper material made of real leather which has been treated a number of times. Follow enclosed care instructions.</p>	<p>COMFORT GUARD</p>  <p>Very lightweight, water-repelling insulation material for additional thermal protection in the forefoot and toe area.</p>	<p>ORTHOLITE® INSOLE</p>  <p>Ortholite® insoles are designed to improve comfort, performance, and long-term cushioning while creating a cooler, drier, and healthier environment in every boot.</p>
<p>THERMO INSOLE</p>  <p>Insole with fleecy top layer and aluminium-lined lower layer for ideal insulation to keep out the cold.</p>	<p>THERMO FIT</p>  <p>Thermally formable foam cushioning with outstanding thermal insulation – a perfect fit for the individual shape of the foot. Heat boot to max. 85°C (185°F) in oven. Step in with socks and tighten laces. Foam adapts automatically. Allow 7-10 min of cooling time.</p>	<p>EXTENDED FIT SYSTEM</p>  <p>The dual insole system offers additional fit control. Less volume for slim feet or more space for growing feet. Just add or remove EVA-layer under insole.</p>
<p>FISCHER FRESH</p>  <p>Fischer Fresh puts an end to unpleasant odours, giving you lasting freshness inside the cross country skiing boot with a pleasant smell and feeling inside.</p>	<p>VELCRO STRAP</p>  <p>Tool-free interchangeable Velcro fastener simplifies replacement if needed.</p>	<p>EASY-FIX VELCRO</p>  <p>Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.</p>
<p>EASY ENTRY LOOPS</p>  <p>Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.</p>	<p>RENTAL FITMENTS</p>  <p>All the features for rental: size marked outside, antibacterial treatment of lining on the inside. Extremely stable insole and special insert pocket for EAN code (optional).</p>	<p>NFC</p>  <p>There is an NFC tag in the right boot sole. Scanning the NFC with a smartphone will open the specific boot model product info on the Fischer website. The UID code can be integrated into digital rental systems.</p>
<p>MADE IN EU</p>  <p>Cross country boots "made in Europe" set the highest standard for our premium products and decrease Fischer's ecological footprint in line with our brand values.</p>	<p>PVC-FREE</p>  <p>We refrain entirely from using PVC (Polyvinylchloride) on boots with the 100% PVC-free logo.</p>	

BOOT FIT CONCEPT

BOOT FIT CONCEPT

RACE FIT

Boot fit concept made for racing. Narrower last and less volume for close fitting. Thus direct power transfer and enhanced ski control.

RACE FIT WS

For female racers. High comfort thanks to specially developed women lasts with narrow heel and forefoot, as well as higher instep area and close fit. Thus direct power transfer and improved ski control.

COMFORT FIT

For sportive and touring consumers. Comfortable last for all-rounder. Ensuring perfect hold and stability. Generous padding and more freedom in the toe and forefoot area lead to more warmth and convenient sensation.

COMFORT FIT WS

For the female Nordic skier requirement. Great comfort thanks to the use of special women lasts with narrower heel and reduced instep. Advanced insulation due to fleece lining and fleece sockliner lead to more warmth.

JUNIOR FIT

Boot concept designed for young feet. Junior specific last for excellent foot hold. Proper flexibility and increased insulation.

OUTSOLES

TURNAMIC® SPEEDMAX SOLE 25

Two-piece TURNAMIC® soles are optimized for racing with the Speedmax boot chassis. They provide a lower stance, reduced weight, wider support, and minimal snow adhesion.

TURNAMIC® SPEEDMAX SOLE

Lightweight 2-piece TURNAMIC® outsole provides optimal flex.

TURNAMIC® RACE SKATE

Extremely sporty skating sole made from Pebax® or Desmopan®. Chassis made of hard material for better power transfer. Arch support for stability and extra torsional stiffness.

TURNAMIC® RACE CLASSIC

Extremely sporty classic sole made from Pebax® or Desmopan® gives you a lower stand height for more stability. Flex grooves and soft sole flex support the smooth kick.

TURNAMIC® PERFORMANCE

The robust and flat construction for sporty, classic style skiing enables a longer gliding phase through easier balance. 2K-Desmopan® material mix for improved performance.

TURNAMIC® EASY WALK

A new wider sole profile and softer material provides a smooth skiing flex and easier off-ski walking.

TURNAMIC® TOURING

The flat construction enables a safe walk and good balance on the skis. The profile is non-slip and self-cleaning. The wear-resistant 1K-Desmopan® material mix is long-lasting and acts against the cold.

TURNAMIC® JUNIOR

The flat, robust construction enables a good stance and easier balance. The profile is non-slip, self-cleaning and Desmopan® acts as an insulation layer against the cold.

ROTTEFELLA® XPLORE

Innovative BC sole featuring integrated spring-pin technology. To be used with ROTTEFELLA® Xplore binding system.

ROTTEFELLA® BC

Optimum support in difficult terrain. Reliable walking thanks to non-slip profile.

VIBRAM® 75MM SOLE

Standard Vibram® 75 sole. Excellent support in difficult terrain. Non-slip profile with specially developed rubber mixture.

SNOW GRIP RACE

Non-slip rubber sole with good thermal insulation for use on winter boots.

TECH FEATURES

TURNAMIC® INTEGRATED FIXATION PLATE (IFP)

Modern interface for screw-free binding mounting on the ski. The two-part TURNAMIC® "Integrated Fixation Plate" is weight-optimised and enables you to adjust ski performance without tools in 7 click-in settings.

SAFE LOCK

Lightweight locking mechanism eliminates accidental openings due to errant pole or ski hits. An audible click confirms that the lever is locked.

TURN LOCK

The ergonomic design of the lever with secure-grip soft components enables intuitive handling when stepping in and out of the binding. Haptic and acoustic response when opening and closing. Protected against unwanted opening.

TOOL FREE

No tools are required for mounting and assembly and this is optimised for easy handling even in difficult conditions on the track. A clearly visible display in the windows next to the setting unit and the click-in presetting make positioning even easier.

DOUBLE LOCK SLIDER

Double locking clip for easy and safe fixation and adjustment of the binding on the IFP (Integrated Fixation Plate).

CLIP LOCK

Clip for easy fixation and adjustment of the binding on the IFP (Integrated Fixation Plate).

FLOWFLEX®

The two-part plate and click-in setting with two closely arranged pins not only guarantees double the safety but also that the binding is fixed on one point. The rest of the binding housing has a floating bearing design along the entire length which has no negative effect on ski performance.

TORSION-PROOFED BODY

The well-thought-out (in all details) housing construction with broad contact surface and torsionally stiff geometry is the basis for direct power transfer. Previously unattained ski control and forward thrust go hand in hand with low weight.

STABILIZER

The shape of the skate housing keeps the ski balanced horizontally after every kick. Perfect ski control – even when the ski is in the air.

HEEL PRE-ADJUST

Adjustable heel section where the boot size is preselected using snap hooks on the heel rails. The heel is automatically positioned with it when the position is adjusted so no separate adjustments are necessary later.

LOW PROFILE

The minimalistic design height ensures a low stand position and maximum stability as a result. This means a more stable gliding phase and a direct feel on the snow at the same time.

STEP-IN

The Step-In mechanism makes it extremely easy to step into the binding. You can hear a clear 'click' when the binding is closed properly.

SKATING FLEXOR

Flexor developed for skating style with flex grade 11.0 and progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 40° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.

CLASSIC FLEXOR

Flexor developed for classic style with flex grade 7.0 and slightly progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 45° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.

JUNIOR FLEXOR

Flexor developed for the target group with flex grade 5.0 and slightly progressive power flow. It ensures the best ski control from the beginning of the Motion and a secure fit inside binding housing. Low-wear materials are what make this high-performance absorber stand out.

LENGTH RECOMMENDATION ACTIVE

REMAINING SUSTAINABLE INTO THE FUTURE

As one of the global players in the winter sports industry, the family-run company is aware of its responsibility to reduce its ecological footprint and develop products that are sustainable and long-lasting. As early as 2001, Fischer received the Energy Globe Award for its biomass heating plant. Since then, numerous measures have been implemented to use renewable energy sources, reduce waste and water consumption, and introduce sustainable procurement strategies.

The buildings at the Ried site are meanwhile heated by local hot water sources, and the entire electricity requirement there - around 6,000 MWh per year - is generated from renewable sources thanks to the photovoltaic system installed on the roof of the production building. The basic energy requirements at the Ukrainian plant in Mukachevo are covered by biomass and the supply chain management system is also designed to be more sustainable in order to improve all associated processes.

Discover more on our website – just scan the QR code.

100% electricity out of renewable sources at RIED / AUT

All the electricity required at the Ried site (~ 6,000 MWh a year) is generated by renewable sources. As a part the installation of solar panels on the roof of the production building was already started in 2019.

Basic process heat covered with biomass at MUKACHEVO / UKR

The basic process heat requirement at our Ukrainian plant in Mukachevo is covered by biomass.

Interior heating is obtained with geothermal energy

Interior space heating at the Ried site is generated exclusively with geothermal energy which arises from local hotwater sources.

Sustainable supply chain management

We are establishing a supply chain management system with a focus on sustainability, to improve all related processes.

Zero Waste Wood Core Production

The wood cores are processed 100% in production - the resulting offcuts are used internally as biomass for our process heat.

Sustainable packaging

We are continuously improving our packaging with focus on reduction of plastic waste, increase of recycling content and reduction of print areas.

Renewable resources

All Air Cores and Wood Cores contain a minimum of 50% of bio-based materials. More than half of the Air Cores are made of cardboard impregnated with resins.

Biogene ingredients

The top foils of the Ranger skis use more than 10% recycled content and 50% bio-based materials in top sheets.

Local production focus

The majority of our products are produced in Europe. One of our goals when selecting parts manufacturers and assembly facilities is to reduce transit distances between locations.

Recycled materials

We use steel edges with a recycling content of 20-25% in all our models. Furthermore, we have a recycling content of 80% in our Titanal of the ski models Ranger and Transalp. The percentage of recycled materials in products and packaging is gradually increased year by year. This is carefully checked for products, as it must not lead to any loss of quality or performance, which would defeat the purpose of sustainability on a larger scale.
